Profile

I am a senior-year software engineering student who has a passion for game development. My strengths lie in effective **teamwork**, rapid adaptability to new technologies, and **self-motivation** to learn. I possess strong knowledge of **C#** programming, **object-oriented design principles**, **design patterns**, and **software architecture**. I have extensive experience with **version control systems** and **agile development methodologies**. Known for my excellent **problem-solving**, **critical thinking**, and **communication** skills, I am driven by a strong passion for gaming and consistently strive to create engaging and high-performing gaming experiences.
